

# HORIZONTAL MEASURING GUIDE

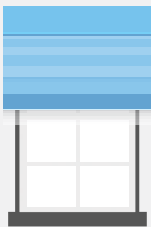

Use a steel measuring tape and measure to the nearest 1/8 of an inch.

## 1. CHOOSE MOUNT TYPE

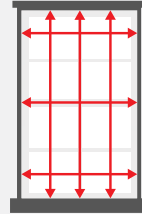

**Inside Mount**  
Window treatments are most commonly installed on the inside of the window frame.

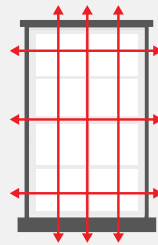

**Outside Mount**  
Occasionally you will need to mount your window treatments outside the window frame. These treatments are mounted directly to the trim or above the windows.

## 2. MEASURE

**Inside Mount**  
Measure the inside of the window frame in **3 places** for width and Length.  
*Record the narrowest width and tallest length.*

**Outside Mount**  
Measure the overall area to be covered.  
*Add extra inches (approximately 3") to the width and length of the window opening for optimum light control and privacy.*

## 3. RECORD MEASUREMENTS

Keep track of your measurements for when you order your window treatments.
